

# Products & Services Catalogue

## Leading Suppliers of Public Transport Hardware

**London, Manchester,  
Leeds, Glasgow,  
Las Vegas, New York,  
Toronto, Abu Dhabi...  
these great cities all have  
something in common:  
they run successful public  
transport systems.**

Mobility, security and sustainability are the central basis for economic growth and prosperity in our globalized world. Future Systems provide intelligent public transport products and specialist engineering solutions to meet these requirements.

Working in close collaboration with leading transport authorities, consultants, architects and designers, we provide a comprehensive range of hardware products, signage systems, electronic information displays with associated installation and maintenance services.

For further details on these products or to discuss our range of 'bespoke' design and manufacturing services please contact our customer support team.

We would be delighted to discuss your individual project requirements with you.

#### **Our range of services includes:-**

- **A comprehensive range of standard products**
- **Design engineering, CAD & Manufacturing services for bespoke products**
- **Prototyping development & In house manufacturing**
- **Installation, maintenance and support**

- **Bus**
- **Rail**
- **Airports**
- **Light Rail Metro**
- **Tram**
- **Bus Rapid Transit**
- **Cycling**
- **Pedestrian Wayfinding**

## Section 1

### **Bus Shelters, Enclosures, Canopies, Walkways, Transport Interchanges, Waiting Rooms, Ticket Booths**

Bus Shelters  
Rail Waiting Shelters  
Tram & Metro Shelters  
Bus Rapid Transit (BRT) Shelters  
Waiting Rooms  
Specialist Enclosures  
Canopies  
Covered Walkways  
Smoking Shelters  
Cycle Shelters  
Glazed Screens & Windbreaks  
Bespoke Structure Design and Manufacturing  
Counter Terrorism Solutions / Blast Resistant Structures  
Station Infrastructure Architectural Metalwork & Fabricated Structures

## Section 2

### **Bus Stops & Accessories**

Bus Stops & Systems  
Temporary Bus Stops  
Bus Stop Flags & Flag Graphics  
Bus Stop Timetable Displays (please refer to section 3)  
Solar Bus Stops (please refer to section 10)  
Bespoke Bus Stop Design and Manufacturing Service

## Section 3

### **Signage, Display Cases, Timetables, Station Identifiers & Wayfinding Signage Systems, 6 Sheet Advertising Displays**

Station Totems & Identifiers  
Signage Systems  
Timetable Displays Cases  
Poster Frames & Displays  
Directional Signage  
Wayfinding Signage Systems  
Finger Posts  
Cycle Scheme Signage  
6 Sheet Advertising Displays  
Signage Graphics Production  
Wayfinding Signage Graphics & Mapping Panels  
Vitreous Enamel Signage

## Section 4

### **Seats & Seating**

Shelter Seating  
Freestanding Seating  
Bench, Perch & Cantilever Seating  
Station Concourse Seating  
Underground Seating  
Custom Seating

## Section 5

### **Counter Terrorism & Security Solutions**

Bomb Blast Protected Shelters and Enclosures  
Bomb Blast Protected Glazed Screens  
Perimeter VBIED Security Bollards (BSI PAS 68)  
Perimeter VBIED Security Bollards (BSI PAS 69)  
CCTV Security Systems  
Bomb Blast Resistant Litter Bins

## Section 6

### **Electronic Information Displays, Kiosks & RTPI Systems**

Shelter RTI Displays  
LED / LCD Displays  
Customer Information Systems  
Platform Displays  
Touch Screen Displays  
Journey Planning Kiosks  
Low Power (solar) Displays  
Bus Stop Flag Displays  
Full Matrix Flag Displays  
Electronic Service Update Boards  
Customer Help Points  
Trapeze Display Range

## Section 7

### **Solar Power Systems**

Solar Development & Engineering Overview  
Solar Shelter Solutions  
Solar Stop Solutions

## Section 8

### TfL Approved Products

Roundels & Station Identifiers  
Signage, Signage Systems & Publicity Displays  
Service Information & Service Update Boards  
Bus Stops, Taxi Stops & Temporary Bus Stops  
Shelters, Canopies, Walkways, Glazed Screens, Windbreaks,  
Waiting Rooms, Staff Accommodation & Assistance Units  
Bus Stations & Interchanges  
Bespoke Architectural Metalwork & Fabrication  
Legible London Wayfinding Signage System  
Cycle Super Highway & Cycle Hire  
Electronic Displays, Kiosks & Help Points  
Seating & Litter Bins  
Solar Power Systems  
Station & Interchange Accessories  
Bollards  
Balustrades & Handrails  
Railings & Fencing  
Installation & Maintenance Services

## Section 9

### Airport Approved Products

FIDS Units  
Blast Protected Shelters, Canopies and Glazed Screens  
Balustrades, Buggy Rails & Handrails  
Cladding Panels & Column Cladding  
Signage Systems  
Customer Information Units  
Trolley Corrals & Barriers  
Construction Related Metalwork Services  
Check-in Areas  
Door Entrance Portals  
Site Fitting & Erection Services

## Section 10

### Litter Bins & Ashtrays

Platform Litter Bins & Trash Receptacles  
Ashtrays

## Section 11

### Bollards, Barriers, Bike Racks & Stations Hardware

Freestanding Bollards  
Sheffield Cycle Racks  
Custom Barriers

## Section 12

### Installation, Civils, Site Erection, Cleaning, Maintenance & Asset Management Services

Installation, Civils & Site Erection Services  
Cleaning & Maintenance Services  
Electrical Commissioning & Maintenance  
Asset Management & Audit Services  
Project Management

## Section 13

### Custom Product Design & Engineering, Graphic Design, Map & Timetable Design, Transport Planning & Advisory

Design & Engineering Services  
Map & Timetable Design  
Graphic Design  
Transport Planning & Advisory Services

## Section 14

### Intelligent Transport & Data Management Systems Software & Hardware Interface to Systems Integrators

Intelligent Transport & Data Management Systems  
Software & Hardware Interface to Systems Integrator

## Section 15

### Construction Related Metalworks Fabrication, Metal Fabrication Services, Fabricated Products

Construction Related Metalwork Fabrication  
Metal Fabrication Services  
Fabricated Products  
Project Management  
Installation & Site Fitting  
Modular Construction & Erection Methods

Bus Shelters

A

## Flight Shelter

- Available in a range of configurations & sizes
- Modular, flexible & innovative design & construction
- Contemporary architectural aesthetics & detailing
- Engineering grade construction & materials
- Future proofed & technology enabled
- Incorporates Intelligent, electronic transport hardware
- Optimum passenger protection, comfort & safety
- Ultimate transport marketing platform
- Robust and vandal resistant
- Range of high grade material & finish options for long lasting performance
- Quick release yet tamper proof features for rapid, cost effective maintenance
- Compliant with BSI structural standards & regulations
- Fully DDA & ADA compliant
- Ability to accept RTPi displays, CCTV, audio PA, solar, kiosks and other advanced information systems
- Range of foundation and installation options available
- Range of glazing materials and options available
- Special 'shock absorbing' glazing retention system
- The choice of many major Cities

- Available in a range of configurations & sizes
- Modular, flexible & innovative design & construction
- Contemporary architectural aesthetics & detailing
- Engineering grade construction & materials
- Future proofed & technology enabled
- Incorporates Intelligent, electronic transport hardware
- Optimum passenger protection, comfort & safety
- Ultimate transport marketing platform
- Robust and vandal resistant
- Range of high grade material & finish options for long lasting performance
- Quick release yet tamper proof features for rapid, cost effective maintenance
- Compliant with BSI structural standards & regulations
- Fully DDA & ADA compliant
- Ability to accept RTP1 displays, CCTV, audio PA, solar, kiosks and other advanced information systems
- Range of foundation and installation options available
- Range of glazing materials and options available
- Special 'shock absorbing' glazing retention system
- The choice of many major Cities

# Aviator Anti-Terrorist Shelter

## Bomb Blast Protected Shelters

Protect Your Employees, Customers & Property from Terrorist Attack

### Features

- Withstands 100kgs of high explosive at 25mtr distance
- Compliant with BS & ISO Standards
- Tested to ISO EX V25 Blast Standard
- As used by BAA
- Patent Pending

### Applications

- Public Transport Systems
- Airports
- Bus & Train Shelters & Stations
- Government, Public & Commercial Buildings
- Sporting Events, Venues & Arenas
- Conferences & Exhibitions
- Permanent & Temporary (portable) Solutions

## Solar Air Conditioned Shelter

**Future Systems, the leading provider of public transport products and services and solar power solutions has introduced the World's First energy efficient and environmentally friendly 'Solar Powered Air Conditioned Passenger Waiting Shelter'.**

The strikingly designed shelters can be installed and fully operational in under a day and offers the benefit of operating without the need to install costly power supply cables or carry out disruptive road excavation.

Running costs are minimal and the high reliability of the unit means that there is little need for maintenance.

Experience from around the World has proven that just putting up a basic waiting shelter or stop is not enough. Transport networks need the technology with which the travelling public have up to date travel information whilst waiting in a safe, secure, comfortable and climate controlled environment for an efficient reliable public transport service.

## Anti Vandal Rail Waiting Shelter

**Designed specifically for rail platforms and bus waiting applications, the robust Metroplan anti-vandal stainless steel shelters are capable of resisting the most determined of vandals by the introduction of a stainless steel structure and special stainless steel glazing system. Stainless steel shelters have been proven to significantly reduce maintenance costs, particularly on unmanned rail stations and vandal prone bus shelter sites.**

## Anti Terrorist Glazed Screens

### Bomb Blast Protected Glazed Screens

Protect Your Employees, Customers & Property from Terrorist Attack

### Features

- Withstands 100kgs of high explosive at 25mtr distance
- Compliant with BS & ISO Standards
- Tested to ISO EX V25 Blast Standard
- As used by BAA
- Patent Pending

### Applications

- Public Transport Systems
- Airports
- Bus & Train Platforms & Stations
- Government, Public & Commercial Buildings
- Sporting Events, Venues & Arenas
- Conferences & Exhibitions
- Permanent & Temporary (portable) Solutions

Please also refer to 'Counter Terrorism & Security Solutions' in section 5 for more information.

# Interactive Wayfinding

**Future Systems provide a wide range of interactive and non-interactive digital display wayfinding products in a variety of designs to suit individual customer requirements.**

Successfully installed in many locations, Future Systems provide the entire product - an end to end solution. Products and services include external kiosk structure, associated graphics, signage and branding, all internal electronic hardware, daylight readable displays, internal PC's and full impact resistant display screens. All products are fully ingress protected from the elements, utilise thermal control engineering dynamics and are fully tested and approved for external on street use.

Future Systems also provide a full content management design and/or take digital data feeds from third party supplied and systems integrators.

# Counter Terrorism & Security Solutions

Product Name	Reference
Introduction	
Bomb Blast Resistant Glazed Screens & Shelters	5A 001

→ Looking for more detailed information?

 (845) 570 2745  [www.futuresystems-inc.co.uk](http://www.futuresystems-inc.co.uk)  [sales@futuresystems-inc.co.uk](mailto:sales@futuresystems-inc.co.uk)

# Counter Terror & Security Products

### Protect your employees, customers and property from terrorist attack

The worldwide political climate has made it more critical than ever for organisations to physically protect buildings, crowded places and the people who frequent them from terrorist attack.

Terrorist targets include key government, public and commercial buildings as well as crowded places such as shopping centres, sport venues, airports, public transport terminals, bus and railway stations.

The personal cost of death and injuries can be considerable, and is exacerbated by disruption to the efficient running of business and public services due to damage to property and infrastructure.

Many companies and public organisations are now implementing anti-terror protection systems in response to government initiatives on protecting people in public spaces.

### Government Agency Driven

In order to combat terrorist threats the UK government has instigated a counter terrorism strategy, which is driven by a number of government agencies, the Home Office, Office for Security and Counter-Terrorism, working closely with the UK Police, and the Centre for the Protection of National Infrastructure (CPNI).

→ Looking for more detailed information?

☎ (845) 570 2745 🌐 [www.futuresystems-inc.co.uk](http://www.futuresystems-inc.co.uk) ✉ [sales@futuresystems-inc.co.uk](mailto:sales@futuresystems-inc.co.uk)

# Counter Terror & Security Products

### Centre for Protection of National Infrastructure

The CPNI encourages the implementation of physical security measures to locations at potential risk and provides security advice, awareness and training, including designing out vehicle borne terrorism.

### National Counter Terrorism Security Office

The National Counter Terrorism Security Office coordinates the activities of local police force Counter Terrorism Security Advisers (CTSAs) who deliver guidance on protecting a wide range of assets, including crowded places

### Future Systems's Solutions

In response to this threat, Future Systems has developed and tested a range of security and anti terrorism products and patented specialist bomb blast protection systems in order to help maintain safety and security, and dramatically minimise disruption should a terrorist attack occur.

(845) 570 2745 [www.futuresystems-inc.co.uk](http://www.futuresystems-inc.co.uk) [sales@futuresystems-inc.co.uk](mailto:sales@futuresystems-inc.co.uk)

## Bomb Blast Resistant Glazed Screens & Shelters

**Future Systems's high strength bomb blast resistant structures are designed to conform to and have been extensively tested to recognised UK, US and international bomb blast standards, typically 100kgs of high explosive at 25 metres range.**

The high strength steel framed structures are fitted with bomb blast rated enhanced glass uniquely secured using Future Systems patented ultra-high strength 'dry fit' retention system.

Future Systems have recently installed its bomb blast resistant waiting shelters, check-in areas, door entrance portals and retail enclosures at the UK's Heathrow, Gatwick and Edinburgh airports.

The ultra high strength construction incorporates Future Systems's high strength bomb blast rated shallow foundation and thus provides robust physical protection, including protection against explosive attack by a vehicle borne explosive device (VBIED).

Please ask to see our Bomb Blast Protection Brochure for further details.

Regular Glazing	<ul style="list-style-type: none"> <li>Georgian Wired Glass</li> <li>Float / Annealed Glass</li> <li>Heat Strengthened Glass</li> <li>Toughened Glass</li> <li>Acrylic</li> </ul>	<p>Regular glazing provides very little protection against bomb blast. Death or serious injury from broken glass and shrapnel is highly probable.</p> <p>HAZARD LEVEL</p>	<p>During the explosion      Shockwave Impact      After the explosion</p> <p><small>Test: 100kgs of High Explosive at 25 metres distance, showing complete disintegration of a standard passenger shelter.</small></p>	✗
Typical Heavy Glazing	<ul style="list-style-type: none"> <li>Standard Laminated Annealed</li> <li>Anti Shatter Films</li> <li>Polycarbonate</li> </ul>	<p>Although less likely to shatter and produce the same levels of shards as regular glazing systems, these glazing types offer limited protection as glazing retention is often inadequate to prevent the entire glazing panel being blown out of its frame - carries significant risk of death or serious injury.</p> <p>HAZARD LEVEL</p>	<p>During the explosion      Shockwave Impact      After the explosion</p> <p><small>Test: 100kgs of High Explosive at 25 metres distance, showing complete disintegration of a conventional bomb blast protected passenger shelter.</small></p>	✗
Future Systems' Bomb Blast Protected Structure	<ul style="list-style-type: none"> <li>Special bomb blast rated laminated glass with specially 'enhanced interlayers' and Future Systems's ultra high strength dynamic 'dry fit' retention system. <small>(patented)</small></li> </ul>	<p>Unique dry system provides instant protection unlike wet silicone systems that can take many days to cure.</p> <p>HAZARD LEVEL</p>	<p>During the explosion      Shockwave Impact      After the explosion</p> <p><small>Test: 100kgs of High Explosive at 25 metres distance. Future Systems's Bomb Blast Protected Passenger shelter is virtually unaffected by the explosion.</small></p>	✓

## Digital Display Specialist

**Future Systems subsidiary company Ferrograph provides specialist intelligent display solutions for transportation and media applications across bus, underground and over-ground rail and air passenger networks.**

Ferrograph's extensive range of quality LCD, LED, TFT and projection displays have been specifically designed and engineered to provide clear and accurate, up to the minute travel information to passengers.

Future Systems Ferrograph are pioneers in the field of ruggedised public information displays and has established a reputation as the leading experts in bespoke electronic passenger display solutions.

Future Systems Ferrograph have a strong transport customer base in rail, bus and air as well as local authorities and other private and public organisations. Long established supply relationships with software companies and systems integrators enables them to offer a complete solution – from design, manufacture through to installation and service support.

Future Systems Ferrograph's strength is the ability and experience to package any chosen Display Technology into a working product solution for Public Transportation Applications

# Bus Shelter Displays

## Bus Shelter Displays

### Key Product Features

- LED and LCD display technology versions
- Optional Full Matrix 180 x 32 pixel format allowing a fully flexible display format.
- 3 Lines x 30 Characters standard
- 9 pixel high Characters as standard for DDA compliance
- Lightweight aluminium enclosure construction with IP65 ingress protection rating
- Vandal resistant polycarbonate front screen
- Environmental control including impact detection and diagnostic control

### Product has been integrated by:

- ACIS (re-brand this product Tay), Trapeze ITS, JMW, Ineo Systrans, Connexions, Thales

## Winnipeg Transit Displays

Winnipeg, Manitoba, Canada - design and supply of LED real time bus information displays and bus shelter and stop hardware.

Future Systems and Ferrograph have designed a bespoke bus stop solution for Winnipeg, working closely with the client's chosen architect and system integrator. 2 sign types have been designed for this client.

### Key Product Features

- Type A: 3 Lines x 36 Characters standard
- Type B: 10 Lines x 18 Characters standard
- 9 pixel high characters as standard for DDA compliance
- Cast Aluminium lightweight construction
- Integrated 47mm high clock
- Tough all-weather construction manufactured to IP65
- Vandal resistant polycarbonate front screen
- Environmental control including impact detection and diagnostic control
- Optional cold weather protection with integrated fans and heaters
- Ferrograph designed and manufactured heating and cooling system to enable operation between -55 °C and +50°C

## Toulouse Displays

**Design and supply, of 145 LED full matrix bus and tram displays for Toulouse.**

**Scope of project:**

- 96 Single sided Bus Displays – LED Full Matrix
- 42 Double sided Tram Displays – LED Full Matrix
- 7 Double sided Platform Indicator Displays

**Key Product Features**

- Fabricated lightweight aluminium enclosure with polyester powder coat finish
- Enclosure Ingress Protection (IP) rating of 65, making it fully capable of operating in an outdoor environment
- Impact resistance will be designed to IK7
- Additional lacquer coating to maximise protection from vandalism and aid removal of graffiti
- 9 pixel high characters as standard for DDA compliance
- Laminated toughened glass screen which will have an anti-glare coating and medium brown tint to provide a better viewing contrast
- Designed to interface with the existing mounting structures, through the use of Ineo's proprietary interface casting

## 28in Ultra Wide Screen TFT Display

### Key Product Features

- Latest generation TFT-LCD panels with typical brightness 1000 cd/m<sup>2</sup>
- 1920 x 357 ultra wide aspect ratio 16:3
- High brightness, sunlight readable energy efficient display
- Small form factor to enable installation within most shelters and to enable bus stop pole mounting
- Fabricated lightweight aluminium construction
- Heat exchanger cooling system to support high temperature extremes
- Rugged enclosure manufactured to IP65 ingress protection rating, impact rating IK7
- Remote Monitoring: Environmental control and diagnostic information
- Able to be mounted within shelter from top surface and to third party posts via optional adaptor bracket

# Info Totem Bus Stop

**The stylish Info Totem RTI bus stop information system provides a high quality platform for the marketing and promotion of bus services, offers simplicity in design, optimum passenger information, alongside flexible installation and serviceability.**

The robust system embodies the latest design thinking for attractive, long lasting on street performance whilst providing the best in electronic, real time or scheduled bus arrival and departure information alongside high quality static information display.

### Key Product Features

- Fitting of RTI Bus Shelter Displays
- Built in Sun Shade for easy viewing in all Weather
- High Quality Timetable Display Case in a wide range of display sizes
- Robust, Long lasting all weather materials
- Sound Structural Engineering
- Built-In Electrical Switch gear Enclosure
- Available in a wide range of attractive finishes with colours and bespoke graphics to suit corporate house styles
- Service Marketing & Branding Platform
- A wide range of foundation fixing methods are available to suit all site conditions

## IP65 Ruggedised 4 Line Full Matrix LED display

The Ferrograph range of Rugged LED displays have been specifically designed and engineered to provide clear and accurate, up to the minute travel information to passengers. Ferrograph has designed a specific family of products to provide on street real time passenger information at bus waiting shelters, interchanges and stops.

### Key Product Features

Display Format: Full Matrix 192 x 56 pixel format allowing a fully flexible display format, 32 characters wide, typical

Display: Tough fabricated edge to edge enclosure with laminated chemically treated safety glass front screen, anti-glare / anti-reflective surface treatment rated to IP65

Climate: Harsh environment -40C to +50C

Remote Monitoring: Environmental control and diagnostic information

Orientation: Landscape

# Bus Interchange Displays

## Bus Interchange Displays

LED Departure Board Displays are part of the Ferrograph range of Transport Interchange Displays. This product family is the ideal choice to display real time passenger information within any modern interchange environment.

### Key Product Features

- 6 and 9 lines of text with 45 characters per line
- 30mm Character height with 9 pixel high characters allowing either partial or full descenders to be used
- Amber ultra-bright LEDs allow daylight viewing
- Extruded aluminium front frame with polycarbonate screen in keeping with the range of interchange displays
- The IP65 rated enclosure provides protection against both the weather and occasional vandalism
- A bespoke design service is available for all mounting and installation locations
- Environmental control including impact detection and diagnostic control

## Fuzion TFT Display Range – 32”, 46”, 55”

The Ferrograph range of Rugged LCD-TFT displays are suitable for use in outdoor public areas offering unparalleled visual clarity, superior contrast and high luminance, making it ideal for the display of general information, advertising and transportation applications where high quality real time information delivery has to be achieved in demanding ambient light conditions.

### Key Product Features

**TFT Display:** Latest generation high brightness sunlight readable display panels Full HD, 1920 x 1080 resolution

**Display Enclosure:** Tough fabricated edge to edge enclosure with high impact protection safety glass screen, anti-glare / anti-reflective surface treatment for optimum viewability and rated to IP65 to protect against water and dust ingress

**Temperature Control:** Heating and cooling sub-system to support wide temperature extremes

**Remote Monitoring:** Centralised functional and environmental monitoring and diagnostic system

**Content Management:** Supports the Ferrograph content management system allowing digital content creation, management and playing

**Orientation:** Portrait or landscape

Rail Displays

D

## Next Train Indicator (NTI)

The 3 Line LED Next Train Indicator has been specifically designed to display real-time next train information to passengers on railway platforms.

- The perfect solution for railway platform applications.
- Ideal for Tramstop or LRT applications.

### Key Product Features

- 9 dot high LED technology ensuring DDA compliance
- Automatic brightness adjustment
- IP66 rated enclosure
- Section 12 low smoke and fume version available for Underground applications
- Single sided or double sided versions available
- Optional LED clock

→ Looking for more detailed information?

# Medium Format Next Train Indicator (MNTI)

The 3 Line LED MNTI has been specifically designed to display real-time next train information to passengers on railway platforms with an integrated clock.

- The perfect solution for railway platform applications.
- Ideal for Tramstop or LRT applications.

### Key Product Features

- 9 dot high LED technology ensuring DDA compliance
- Automatic brightness adjustment
- IP66 rated enclosure
- Section 12 low smoke and fume version available for Underground applications
- Single sided or double sided versions available
- Optional LED clock

# Emergency Do Not Enter (EDNE) Display

Ferrograph's LED "Emergency Do Not Enter" (EDNE) display has been specifically designed as a warning display used to restrict access to rail and underground station entrances.

### Key Product Features

- 24 x 128 LED Matrix
- DDA compliance
- Automatic brightness adjustment
- IP66 rated enclosure
- Section 12 low smoke and fume version available for Underground applications
- Single sided

Mounted under canopy ceiling, can also be fascia mounted

Suspended unit, cables mounted within tubular supports, pigeon wire attached

TFT Displays

## Solar and Wind Powered LED Flag

The renewable energy LED Countdown Flag Display has been designed for locations where provision of power is an expensive and challenging problem

Designed specifically to display real time passenger information in outdoor public environments, typical applications include:

- On street locations where bus shelters or stands are unavailable
- Stand alone post mounting
- Suitable for out of town or rural locations
- No Mains power required

### Key Product Features

- 3, 6 and 9 service options
- Single or double sided
- Amber ultra-bright LEDs allow daylight viewing
- Compact enclosure allows external bus stop pole mounting
- Rugged on demand push button to activate sign from power saving mode
- Display illumination is controlled via a brightness sensor which manages the optimisation of brightness and power consumption display
- The IP65 rated enclosure provides protection against both the weather and vandalism
- A full range of Future Systems posts, mountings and display cases are available

## Rugged TFT Display

The Ferrograph Rugged TFT Display is a rugged display suitable for use in outdoor public areas such as ticket offices, bus interchanges and rail station concourses.

Designed specifically to display passenger information in transport interchange environments, typical applications include:

- Rail and Underground Stations
- Bus Stations
- Airports
- Any Outdoor or Public Environment Application
- Industrial Applications

### Key Product Features

- Screen sizes available 15", 17", 19", 22", 26", 32", 42" & 57"
- Optional high brightness and sunlight readable TFT
- Optional optical coating of TFT panel available for outdoor environment
- A range of TFT panel resolutions including VGA, SVGA, XGA and SXGA available
- All aluminium/stainless steel weatherproof construction with IP65 ingress protection rating
- Various levels of integrated PC available, depending on user application
- Communication via LAN, RS232 or RS485 Updates via USB key without the need to open the display

## TFT Totems

The TFT Totem can be integrated into the Future Systems Elite range of shelters or retro fitted to existing shelters. Specifically designed for use in the urban environment the display can provide both static and real-time information to the travelling public

Designed specifically to display passenger information in transport interchange environments, typical applications include:

- Transport interchanges
- Bus Stations
- Tramstop or LRT applications

### Key Product Features

- Landscape and portrait versions available
- Latest generation TFT panel with a minimum lifetime of 50,000 hours to half brightness
- Digital 1 bit/Pixel accurate mapping leads to exceptionally clear display with no analogue signal path
- All aluminium weatherproof construction
- Ingress protected to IP65
- Integrated PC with Ferrograph data driver software
- Communication via LAN, RS232 or RS485. Updates via USB key without the need to open the display
- Operating range 0°C to +40°C. Optional environmental control including impact detection and diagnostic control is available

# Interactive Displays - Kiosks

**Ferrograph rugged Interactive Kiosk provides real-time digital information to the travelling public in outdoor and unsecured areas .**

**Next bus and train service information is combined with a local Point of Interest and Journey Planning services. Ideal for use in:**

- Transport interchanges
- Bus stations and high use stops
- Railway platform or concourse applications
- Tramstop or LRT applications

### Key Product Features

- 19" TFT Summary screen at top front face
- 17" TFT at user height, front face
- Touch-screen using Projected Capacitive Technology (PCT)
- Secure Web based browser with on-line Journey Planning and approved website access
- Tough IP65 stainless steel enclosure with laminated safety glass front screen, anti-scratch / anti-reflective surface treatment
- LAN communication as standard
- Optional communications: Wi-Fi, 3G & ADSL
- Optional ability to communicate to other display devices at same location via Wi-Fi, 3G

## Interactive Displays - Smart Travel Touch Screen

Ferrograph's TFT Touch screen Information Kiosk display offers a rugged space saving solution due to its compact design.

Designed specifically to display bus or train service information, typical applications include:

- Transport interchanges
- Bus stations and high use stops
- Railway platform or concourse applications
- Tramstop or LRT applications

### Key Product Features

- Fully Rugged Zintec Steel freestanding enclosure
- Low-level installation to allow Optimum viewing angle for PRM passengers
- IP54 sealing rating
- Laminated safety glass
- 17" Landscape LCD
- Integrated PC (optional)
- Anti reflective coating (optional)
- Ideal for Train Information or Retail Advertising applications
- Stainless steel protection bar (optional)

# Interactive Wayfinding

**Future Systems provide a wide range of interactive and non-interactive digital display wayfinding products in a variety of designs to suit individual customer requirements.**

Successfully installed in many locations, Future Systems provide the entire product - an end to end solution. Products and services include external kiosk structure, associated graphics, signage and branding, all internal electronic hardware, daylight readable displays, internal PC's and full impact resistant display screens. All products are fully ingress protected from the elements, utilise thermal control engineering dynamics and are fully tested and approved for external on street use.

Future Systems also provide a full content management design and/or take digital data feeds from third party supplied and systems integrators.

# Solar Power & Renewable Energy Systems

**Future Systems are a leading developer and provider of stand alone 'off grid' solar powered street furniture products. Future Systems have installed over 10,000 solar installations Worldwide.**

### Continuous Development & Research

Future Systems undertakes a continuous programme of solar and renewable energy research, development and engineering.

Future Systems's dedicated solar engineers work continuously on leading edge solar, LED energy management and battery technology developments to ensure that we are supplying the most reliable, value for money solar products at all times.

Future Systems's UK solar development headquarters is supported by our overseas Solar R&D development centres in China and Australia.

Future Systems operate internationally and have divisions and contracts in the USA, Canada and the Middle east. Future Systems are therefore able to adopt and harness best solar practice on a global basis.

In addition to a range of solar products for the passenger transportation industry, Future Systems delivers custom designed solar, LED lighting and renewable energy solutions to meet specific customer requirements.

# Solar Systems, Research & Development

### System Development

Future Systems has developed a range of 'off grid' solar solutions for use primarily in the public transport and wayfinding signage sector. The designs include complete 'systems' for fully automated operation 24/7, with bespoke design intelligent solar energy management systems, LED lighting units, wiring harnesses, solar PV arrays, batteries and associated enclosures that have been specifically developed for a range of individual products, applications and climates (UK, USA & Middle East).

The development has included solar courtesy / information lighting systems for bus stops, bus shelters, information displays, advertising displays, signage systems, fare payment/ticket machines and RTI displays.

### Areas of in House Specialism

- Solar Energy 'Optimization, Management and Electronic Control Systems'
- Leading edge LED lighting illumination technology
- Low energy intelligent digital passenger display systems
- Solar Powered Fare Payment & Ticketing Solutions
- Solar powered climate control systems, AC and Heating for Future Systems's growing global passenger hardware market

## Solar Energy Management System & Software

# Solar Energy Management System & Software

### Solar Energy Management Systems

Future Systems's EMS Controllers are specialist designed and engineered high efficiency solar powered LED lighting charge regulator and optimisation units designed to drive high efficiency solar lighting and digital display products.

Activated via dusk or on activation of a switch input or infrared device, the controller is optimised to preserve the battery against excessive drain, regulate charging and prevent overcharging.

Highly flexible, the system designs ensures they can take a large variety of Solar PV modules.

### Energy Saving Algorithm

The EMS system utilizes software based energy saving algorithms which allows the controller to continuously assess the battery condition and to adjust the output of the LED lighting units accordingly. This ensures the batteries are never drained to a detrimental level.

# TfL Solar Bus Stop System

### Introduction

Manufactured, installed and maintained by Future Systems, leading solar bus stop product and bus stop solar electronics system. Provides illumination of flag and timetable display throughout the hours of darkness.

### Client:

Transport for London

### Product:

Solar Powered Bus Stop Information System

### Specification:

- Glass Tedlar PV Solar Array
- Bi-Pass Diodes
- Energy Management & Charge Regulator
- LED Flag Down Lights & Timetable Display
- 17,000 sites throughout Greater London
- Solar Lighting
- Solar Audio Announcement Option
- Solar Electronic RTI Display Option

Refer to 'Bus Stops' section for further details

# Elite Solar Bus Stop System

### Introduction

Manufactured, installed and maintained by Future Systems, leading entry level solar bus stop product and bus stop solar electronics system. Provides illumination of flag throughout the hours of darkness and the display case by simply pushing the illuminated solar push button.

### Clients:

Many clients throughout the UK, USA and Canada

### Product:

Solar Powered Bus Stop Information System

### Specification:

- High Output PV Solar Array
- Bi-Pass Diodes
- Energy Management & Charge Regulator
- LED Flag Down Lights & Timetable Display
- Solar Lighting
- Solar Audio Announcement Option
- Solar Electronic RTI Display Option

Refer to 'Bus Stops' section for further details

# Solar Bus Shelter Systems

### Custom Made Solar Shelter Systems

Future Systems supply a range of solar lighting modules for a wide range of bus shelter designs, including flat, curved and pitch roof configurations.

Future Systems's solar lighting systems can be custom made to fit new shelters or retro fit existing shelters to suit all customer requirements.

### Features Include

- LED Energy Efficient Lighting Modules
- Energy Management System
- High Performance Solar Panels
- Specialist Wiring Loom Assemblies
- Long Life High Performance Solar Batteries
- Passive Infra-Red Detection
- Auto System Management & Power Save
- Light Output Adjustment - 'bright up' facility

## Anti Vandal Rail Waiting Shelter

**Designed specifically for rail platforms and bus waiting applications, the robust Metroplan anti-vandal stainless steel shelters are capable of resisting the most determined of vandals by the introduction of a stainless steel structure and special stainless steel glazing system. Stainless steel shelters have been proven to significantly reduce maintenance costs, particularly on unmanned rail stations and vandal prone bus shelter sites.**

## Interactive Wayfinding

**Future Systems provide a wide range of interactive and non-interactive digital display wayfinding products in a variety of designs to suit individual customer requirements.**

Successfully installed in many locations, Future Systems provide the entire product - an end to end solution. Products and services include external kiosk structure, associated graphics, signage and branding, all internal electronic hardware, daylight readable displays, internal PC's and full impact resistant display screens. All products are fully ingress protected from the elements, utilise thermal control engineering dynamics and are fully tested and approved for external on street use.

Future Systems also provide a full content management design and/or take digital data feeds from third party supplied and systems integrators.

# Airport Approved Products Airport Related Metal Fabrications

### Introduction

Future Systems are an approved 'tactical' supplier to British Airports. Future Systems provide airport operators with high quality fabricated metalwork products and custom architectural metalwork services.

Future Systems provide a full end to end service, including design, manufacture, on site fitting & erection. Future Systems's staff have the necessary training and passes for 'airside' operations.

### Products & Services Include

- Full range of Airport Approved products
- CAD Design & Specialist Airport Engineering
- Bespoke Airports Metalwork Fabrication
- Architectural Metalwork & Steelworks
- Laser Cutting, Forming & Bending etc.
- Specialist Finishing & Powder Coating
- Site Installation, Fitting & Erection
- 125,000 sq/ft manufacturing facility near
- Heathrow airport

**Please also refer to Construction Related Metalwork Fabrication Section**

## Highway Impact Metal Bollards Counter Terror & Security Systems

### Material / Specification:

180mm Ø mild steel galvanised or satin stainless steel fabrication with domed cap detail. backfilled with concrete for extra strength.

### Finish:

Supplied in choice of satin polished stainless steel or architectural grade exterior powder coated paint in a choice of colours.

### Optional Graphics:

Three off 150mm applied uPVC retro reflective engineering grade SAV DfT highway yellow bands alternate and equally spaced from top edge.

### Construction

All construction shall be in accordance with DfT Signs Manual Design & Manufacture construction guidelines and BS standards

### Installation Options /Foundations:

Can be supplied with 10mm thick base plate for surface mounting with resin anchors, or cast-in using 500mm x 500mm x 900mm foundation with ST4 concrete

## Nationwide Installation, Civils & Site Erection Services

**Future Systems provide a comprehensive range of nationwide installation and erection services for street furniture, signage and passenger infrastructure systems using our skilled and fully trained in house installation operatives.**

### **Services include:**

- Site Survey & Pre-Installation Services
- Site Surveys
- Site Photographs
- Superimposed Images & Photomontages
- Site Maps & Plans
- Utilities Search & Applications
- Opening Notice Applications & Approvals
- Works Planning & Management
- Power Supply Application & Green Energy Alternatives
- Risk Assessments & Method Statements

### **Installation & Erection Services**

- Compliance & On-Street Safety
- Signing & Guarding
- Full Civils & Excavation Service
- Foundation Build Service (range of foundation options available)
- Cable Laying & Trenching
- Stop & Shelter Erection Services
- Reinstatement Services

**A fully certified service. CSCS, NRSWA, HSE and CDM accredited.**

# Transport Planning & Advisory Services

**Future Systems provide practical advice, guidance, products and services to enable cities to develop, implement and run modern efficient public transport systems.**

Future Systems have assisted transport agencies globally with their public transport infrastructure and supporting operating frameworks.

**Services include:**

- Planning & Advisory Services
- An audit and review service of client's existing transport infrastructure and transport strategy
- Transport Development Plan and City Needs Review
- Client Specific 'Transport Strategy' writing service
- Legislation, compliance & best practice guidance
- Implementation advise and guidance
- Route survey and route planning
- Tender writing & evaluation service
- Project management services
- Animated 3D simulation service; see your Transport Strategy come to life in your City
- Costing, budgeting and forecasting service
- Funding guidance
- Range of finance and purchase options available

## Metal Fabrication Services & Fabricated Products

# Metal Fabrication Services & Fabricated Products

### The Company

Founded in 1975, Future Systems is a leading company in the design, manufacture, finishing and installation of high-quality construction related fabrication products and services.

Working with top clients, architects and contractors, Future Systems meets the individual needs of customers who expect the very best.

With headquarters and 125,000 sq/ft manufacturing facility in West London, depots throughout the UK and overseas divisions in North America and the Middle East, Future Systems offers worldwide experience certified quality service and support in every project phase.

The scope of work includes technical sales advice, budget pricing, tendering, CAD design, engineering, manufacture, finishing, supply and site installation/fitting of any type of construction related fabricated metalworks.

### Specialist Areas of Operation

- Construction Related Fabrication Services
- Airport & Transport Infrastructure Fabrication
- Industrial Machine Special Fabrication
- Stainless Steel Fabrication
- Aluminium Fabrication
- CAD Design
- Product Management
- Installation and Site Fitting
- Modular Construction and Site Erection
- Specialist Finishing
- Elevator Engineering Services

## Metal Fabrication Services & Fabricated Products

### Metal Fabrication Services & Fabricated Products

#### Manufacturing Facilities

The 125,000 sq ft production facility in West London, houses some of the most advanced CAD/CAM linked manufacturing equipment available in the industry.

Latest computerised laser processing manufacturing technology and machinery combine with proven procedures, traditional values, skill and experience to deliver competitively priced top quality products.

Future Systems's combined expertise in fabrication, sheet metal component and sub-assembly development and product finishing can help customers to minimize time to market by reducing or eliminating problems with production by producing Total Engineering Solutions.

#### Manufacturing Cells

- Raw material laser processing
- CNC Machining
- CNC Punching
- Folding and forming
- Fabrication
- Assembly line
- Pre-treatment and finishing

Building related metal fabrication services

Transport infrastructure fabrication

Industrial machine special fabrication

Commercial elevator engineering services

# Metal Fabrication Services & Fabricated Products

### Project Management

Future Systems's experienced, well-trained and disciplined project managers follow proven project management procedures.

Utilisation of leading planning and management tools gives Future Systems full control of quality, cost and programme and ensures successful project management.

Strict adherence to all company quality and health and safety processes ensures a high quality product and a safe working site. Future Systems are able to give an individual response to the needs of each project and respond quickly and accurately to changes wherever they occur.

# Metal Fabrication Services & Fabricated Products

### **Installation & Site Fitting**

Future Systems's highly experienced and qualified installation, site fitting and contract management personnel work strictly to robust quality and health and safety procedures. Future Systems ensure the highest level of quality, time and cost reliability. Close attention to detail, and maximum utilisation of off-site fabrication techniques ensures Future Systems's industry respected reputation.

### **Modular Construction, Site Fitting & Erection Methods**

Future Systems employs modular construction methods which allows the construction of technically complex fabricated metalwork to be undertaken by offsite manufacturing techniques.

Factory fabricated and assembled, the parts are then broken down, packaged and shipped to site. After delivery to the construction site components can be structurally assembled more quickly, allowing rapid, reliable start up on site and greatly reduced site occupancy times.

Modular manufacturing techniques also allows construction to exacting specifications in a clean environment to ensure a higher quality product than normal on-site methods can achieve.
