

CUSTOM STRUCTURES

Shelters • Canopies • Covered Walkways
Screens • Waiting Rooms

future
systems inc

THE LEADING SUPPLIER

Future Systems Inc are the leading manufacturer of custom fabricated structures, including shelters, canopies, covered walkways, glazed screens and platform waiting rooms.

Working in collaboration with architects, scheme designers, main contractors and transit authorities, Future Systems Inc has over 40 years of experience, with over 50,000 structures installed Worldwide.

Custom Fabrication Services

Future Systems Inc's comprehensive in-house design and engineering enables the timely, cost effective supply and installation of fabricated architectural structures to suit any client requirements. Over the years Future Systems Inc have provided award winning structures for a wide range of applications.

All of Future Systems Inc's structures are fully engineered to the highest standards and can be supplied in a range of elegant, robust materials and finishes to suit individual architectural requirements and to exacting customer requirements.

Our many years of experience enables us to provide high quality custom products that are easy and cost effective to install, erect and maintain.

Standard 'Off the Shelf' Products also Available

In addition to our custom design and manufacturing services, we also have a comprehensive range of standard 'off the shelf' shelters, canopies, covered walkways and glazed screens.

SPECIALIST AREAS OF OPERATION

- Construction Related Fabrication Services
- Airport & Transit Infrastructure Fabrication
- Stainless Steel & Aluminum Fabrication
- Laser Cutting and Forming
- CAD Design & Specialist Engineering
- Specialist Finishing Services
- Signage Graphics Production
- Project Management
- Nationwide Installation & Site Fitting
- Modular Construction & Site Erection

SECTORS & INDUSTRIES SERVED

- Bus Stations & Interchanges
- Bus Rapid Transit
- Train Stations
- Tram & Light Rail Networks
- Airports
- Cycle Storage
- Schools
- Colleges & Universities
- Shoppings & Retail

Materials & Finishes Available

Our structures can be supplied in a range of combined materials & finishes, including:-

MATERIALS

- Stainless steels
- Steels / Galvanised
- Aluminum
- Glass
- Composite Fiber
- GRP - Glass Reinforced Plastic Composites
- GRC - Glass Reinforced Concrete
- Stones and granites
- Composite stone materials
- Timber

FINISHES

- Brushed, satin and linen finish stainless
- Shot peened stainless
- Polyester powder coated – all colors
- Galvanizing
- Anodizing
- Anti-graffiti coatings
- Wet Paint
- Custom Finishes
- Tnemec Paint

Additional Features & Accessories

Our structures can be supplied with a range of accessories, including: -

- Seating
- Range of glazing options (glass, laminated glass, polycarbonates, composites)
- Automatic sliding doors
- Heating & air conditioning
- Advertising displays
- Rainwater management
- Signage and custom printed graphics
- Digital RTI Displays
- CCTV Cameras
- Anti-Graffiti Protective Coatings
- Bomb Blast Protection
- Solar Power Lighting

Custom Features & Services

Working in collaboration with architects, scheme designers, main contractors and transit authorities, Future Systems Inc has over 40 years of experience, with over 50,000 structures installed Worldwide.

Design & Engineering Services

- Concept designs
- 3D visualizations & renderings
- Animations and walk throughs
- CAD manufacturing drawings
- Structural engineering
- Foundation designs
- Prototyping & product testing

Manufacturing Services

- Construction related fabrication
- Architectural metalwork
- Structural Steelwork
- Laser cutting and forming
- Specialist Finishing Services

Stratford Bus Station, London

Deansgate, Manchester UK

Project Management

Future Systems Inc's experienced, well-trained and disciplined project managers follow proven project management procedures.

Utilization of leading planning and management tools gives Future Systems Inc full control of quality, cost and programme and ensures successful project management.

Strict adherence to all company quality and health and safety processes ensures a high quality product and a safe working site. Future Systems Inc are able to give an individual response to the needs of each project and respond quickly and accurately to changes wherever they occur.

Collaboration with clients, architects & designers
From concept to manufacture - a seamless process

Dundee Bus Enclosure, UK

Modular Construction Techniques

Future Systems Inc employs modular construction methods which allows the construction of technically complex fabricated metalwork structures to be undertaken quickly and safely by minimizing on-site construction times.

Factory fabricated and pre-assembled, the sub-assembled parts are packaged and shipped to site. After delivery, the components can be readily assembled, allowing reduced site occupancy times, reduced costs and shorter programme times.

Installation, Site Fitting & Erection Services

Future Systems Inc provide a comprehensive nationwide assembly, erection, site fitting and construction supervision.

Services Include:-

- Civils & Excavation
- Foundation Construction
- Installation & Erection
- Project Management
- Electrical Connection & Commissioning
- Cable Jointing
- RTI Support Services
- RTI/ITS System Commissioning
- Testing & Certification
- Maintenance
- Emergency Call Out Services

Why choose Future Systems?

Mobility is the central basis for economic growth and prosperity in our globalized world, both in urban centers of population and in less densely populated areas.

Future Systems provide intelligent mass transit solutions to meet this basic requirement.

Future Systems blend specialist mass transit design engineering and manufacturing skills with accessibility design, graphic design, signing, intelligent electronic transit systems, safety and statutory standards, system planning, technical specification, user analysis, installation and maintenance expertise, based on an in-depth knowledge of mass transit operations.

Future Systems believes transit environments should be welcoming, safe and easy to navigate. Transit systems should be highly visible, distinctive and easy to use, by everyone. Graphic, service and operational information should be unambiguous and clearly presented. To achieve all of these things our design approach has to be collaborative and rigorous, intelligent as well as inventive.

Future Systems have a proven track record in the provision of integrated and coordinated mass transit solutions that attract travellers by successfully transforming the waiting experience. This is based on a sound understanding of the travellers requirements - both now and projected into the future.

This is achieved by an assembled team of expertise with professional experience extending over 40 years.

Future Systems focus their attention on the points on the transit network where passengers "join", "transfer" and "leave". These are key components to improve, if area wide mass transit solutions are to be effective.

Future Systems offer the full 'end-to-end' service including all the key stages: Audit - Analysis - Specification - Design - Manufacture - Installation - Lifetime Maintenance.

Future Systems provide a 'one-stop-shop' to passenger transit executives, councils and bus operators, that ensures good delivery with less dependence on the clients management resources.

Future Systems are involved in an on-going process of identifying the best products and services associated with their business sector and ensuring these become part of their consolidated solution.

We keep pace with local and national agencies affecting public transit policies. We keep informed about relevant legislation, investment programmes/priorities, environmental issues and other key factors such as concerns about 'reduction in carbon emissions'.

Travellers appreciate and respect the quality infrastructure that Future Systems provides. It improves the appearance of their sidewalks and stations. It ensures places are valued and looked after,

Keeping the infrastructure up-to-date makes it more relevant for lifestyles today and demonstrates that public transit is very much part of the 21st century.

Future Systems want to work in partnership to provide public transit solutions which deliver a promising future.
