College & University Campus Transit Stop

The 'Elite' college transit stop system has been designed specifically for transit stop use and incorporates the following specialist features:

Strong, lightweight construction for improved safety and easy handling, special recessed channels for fitting quick release tamper proof fixtures, ability to be installed in a variety of configurations including over existing square sign posts. Durable exterior quality finishes, including architectural grade anodising and polyester powder coating in a wide range of colors.

The post can be pre wired with electrical and telecommunications cables for lighting and real-time information display systems.

Key Features

STYLE & BRANDING

- European designed, Made in America
- High profile tool for the promotion of transit routes and transit services

STRENGTH & PERFORMANCE
