Promote cycling and walking REDUCE POLLUTION

CYCLIST & PEDESTRIAN Counting Kiosk

With increasing traffic across cities and states there is a growing need to reduce pollution, which has led to a change in transport policy. Future Systems are encouraging cycling & walking across major US & Canadian urban areas with the supply of cyclist & pedestrian counting kiosks.

Don't let this opportunity pass you by. Join the Smart City revolution today!

Tailor your digital interactive display to your own requirements

Each kiosk can be fitted with a range of smart sensors to collect data from the surrounding environment, from air quality monitoring, traffic congestion, all of which can be displayed on the digital interactive screen.

The HD interactive digital display screen is the perfect platform for advertising, information & assistance and wayfinding.
