TRANSFORMING CITIES
Providing a Better Quality of Life

Smart City, Smart Mobility and Active Travel Products & Services
Improving Mobility, Health & Quality of Life in Towns and Cities

Towns and cities throughout the world are using Future Systems Inc’s range of urban infrastructure to help transform their cities. Future Systems Inc’s products facilitate and encourage low carbon mobility and active travel, whilst improving public health, air quality and quality of life.

With significant health and environmental benefits, Future Systems Inc’s Smart Mobility, and Active Travel products encourage walking, cycling and public transit usage, reducing congestion, greenhouse gas emissions, air pollution, creating cleaner towns and cities, and cleaner air!

Future Systems Inc has established itself as the market leader in the provision of clean-tech, green energy on-street public elements and infrastructure for commuters, travellers and the public.

Future Systems Inc has equipped many of the world’s largest and most progressive towns and cities with pedestrian wayfinding, cycling, e-mobility, autonomous vehicle, bus, rail, bus rapid transit and air passenger transit infrastructure.

Key Benefits and Features of Future Systems Inc’s Products:

- **Health** - Encourages walking, cycling and low carbon mobility - providing health benefits to all!
- **Reduced Congestion** - Reduces reliance of other forms of transit
- **Environmental** - Reduces road traffic congestion, exhaust emissions and greenhouse gases
- **Air Quality** - Reduces air pollution and provides cleaner air
- **Safety** - Creates safe and welcoming environments by directing people to the right areas
- **Transit Links** - Enhances key routes in and around the city centre, promoting and linking public transit interchanges
- **Designs** - Range of contemporary, modern and historic designs available to suit your town or city
- **Essential products to enable cities to embrace the SmartCity and Intelligent Mobility transformation**
- **Interconnected** - Providing Wi-Fi connectivity - an essential Internet of Things platform
- **Device charging via USB ports Internet enabled**
- **Digital Advertising Platform** - providing valuable advertising revenue
- **Accessibility** - Making your town or city fully accessible to pedestrians, commuters and tourists
- **Promotion** - Quickly identifies routes, destinations and promotes your town or cities specific places of interest
- **Economy** - Boosts local business and the economy by increasing footfall and trade
- **ESG** - Environmental, Social and Governance - Assist organisations achieve ESG - the three central factors in measuring sustainability and societal impact

Future Systems Inc Smart City Options

**Wayfinding Signage**

Wayfinding signage systems are the key to promoting walking to residents, commuters and visitors by helping them navigate towns and cities on foot. With user friendly, easy to use detailed maps showing which routes and directional path to take, wayfinding boosts local business and the economy by increasing passing trade and energizing locations. With significant health and environmental benefits, wayfinding encourages walking as an alternative method of transit, reducing congestion, greenhouse gas emissions, air pollution and creates cleaner towns and cities and cleaner air. Future Systems Inc can provide a wide range of contemporary, modern and historic designs to suit your own town or city.

**Cycle Counting Totems & Shelters**

Future Systems Inc’s Smart Digital Cycle counting totems monitor cycle flow. The counters feature the very latest low-power digital display technology and provide real-time updates of cycling usage. The counters displays information in the form of daily and cumulative counts of cyclists, a smart way to promote cycling in towns and cities, encouraging a healthier lifestyle. Future Systems Inc also provide a full range of cycle wayfinding signage and route identifiers.

**Smart Street Digital Totems & Sensors**

The next generation of urban infrastructure, Future Systems Inc’s digital info hub totems transform urban landscapes, city streets, public spaces and public transit into dynamic, digital, hyper-connected, SmartCity streetscapes.

Incorporating the latest digital display and digital communication Technologies, our totems can provide digital dynamic signage, interactive wayfinding mapping, real-time messaging, air pollution sensors and ultra fast Wi-Fi.

**Environmental Bus Shelters**

Future Systems Inc’s environmental bus shelters help promote public transit usage. Made from recycled materials, our range includes options for EV bus charging, wind turbines and ‘green/living roofs’ that help reduce CO₂ emissions, purify air and provide ideal habitats for our endangered insects & wildlife.
Public Transit, Mobility, Active Travel and Smart City Infrastructure

Why choose Future Systems Inc?

Sustainable mobility is the central basis for economic growth and city prosperity in our globalized world, both in urban centres of population and in less densely populated areas.

Future Systems Inc provide intelligent public transit and active travel solutions to meet this requirement.

Future Systems Inc blend specialist public transit design engineering and manufacturing skills with accessibility design, graphic design, signing, intelligent electronic transit systems, safety and statutory standards, system planning, technical specification, user analysis, installation and maintenance expertise, based on an in-depth knowledge of public transit operations and movement of people in our towns and cities.

Future Systems Inc believes transit systems and environments should be sustainable, welcoming, safe and easy to navigate. Transit systems should be highly visible, distinctive and easy to use, by everyone.

Future Systems Inc have a proven track record in the provision of integrated and coordinated active travel and public transit solutions that attract travellers and encourage modal shift by successfully transforming public transit and the mobility experience. This is based on a sound understanding of the traveller’s requirements - both now and projected into the future.

Future Systems Inc focus their attention on the points on the transit network where passengers “join”, “transfer” and “leave”. These are key components to improve, if area wide public transit solutions are to be effective.

Future Systems Inc are a leading ESG company (Environmental, Social and Governance). Future Systems Inc’s green street infrastructure products assist organisations achieve ESG - the three central factors in measuring sustainability and societal impact.

Future Systems Inc work with clients to transform cities, providing solutions that deliver a promising and sustainable future.
